B&G®

ADDENDUM for Zeus³S Operator Manual

The synchronize feature

The C-MAP Embark button in the system controls dialog is replaced with a Synchronize my data button. The C-MAP Embark option in the Services Settings dialog is also replaced with a Synchronize my data option.

Example of the Synchronize my data button in the system controls dialog:

Using the synchronize feature

You can use a browser to sign-in at www.letsembark.io or you can sign-in to your B&G app account from your mobile device or tablet to manage (create new, change, move, and delete):

- Waypoints
- Routes
- Tracks

Use the MFD's Synchronize my data option to synchronize between the MFD and your B&G app account.

→ **Note:** PredictWind waypoints are not included in the Synchronize my data feature.

Requirements

- An account with the B&G mobile app

→ **Note:** Your C-MAP Embark or C-MAP app account credentials can be used to sign-in to the mobile app. You do not need to create a separate mobile app account.

- To synchronize, the unit must be connected to the internet. To connect the unit to the internet, refer to the operator manual.

Synchronizing

To synchronize the MFD data and your B&G app account data (includes your data at www.letsembark.io), open the Synchronize my data feature from the System Controls dialog or the Services settings dialog.

After sign-in, the system advises the last time synchronizing occurred and the following options are available:

- Edit - use to change sign-in credentials
- Auto Synchronize - synchronizing occurs periodically in the background when connected to the internet
- Synchronize now - synchronizing occurs immediately
