Sol-Go Flexible Solar Panels

Sol-Go panels are manufactured using industry-leading SunPower Maxeon cells, offering the highest power density on the market: 35% higher than some conventional cells.

Sol-Go panels offer excellent response to partial shading. Just one leaf can reduce many panels to 40% power output. Sol-Go panels retain 90% output under similar conditions.

Sol-Go panels offer a full **5 year** power and **2 year** product warranty.

Sol-Go	115W	Monocrystalline	47" x 22"	\$398
Sol-Go	165W	Monocrystalline	62" x 22"	\$728
Sol-Go	185W	Monocrystalline	47" x 34"	\$798
Sol-Go	210W	Monocrystalline	52" x 32"	\$948
